

## Web Hosting

Our web hosting and domain name providers are considered one of the best in the world. We have used them reliably since 1998. Their record of reliability is an astounding 99.995%.

We were so impressed with their services that we decided to acquire our very own Hosting Server from them. Thus, Hosting Protocols ([www.hostingprotocols.com](http://www.hostingprotocols.com)) was born.

Every hosting company must upgrade their systems regularly to protect their customers against spamming, viruses and other unpleasant web attacks. The minimum web host should be up at least 99.50% of the time to qualify as being reliable.

We would like to thank each and every one of our clients for using our hosting services.
