

## Benefits

FYWD is packed with features that take the coding out of web programming. With it, the time required to develop complex web sites and web applications can be reduced from weeks to days or even from days to hours.

Have an unprecedented control over your website's content area through FYWD's user-friendly, drag-and-drop interface that you can "develop" within minutes, not months.

### User-Friendly

- Build and manage your website through a wonderfully intuitive interface that the novice can master quickly, and the master can use efficiently.

### Browser-Based Operation

- FYWD operates entirely through the internet, so you can manage your website from any computer, from anywhere in the world -- all you need is an internet connection!

### Dramatically Reduced Development Time

- FYWD streamlines your web development process by eliminating inefficient programming tasks and simplifying complex operations, without limiting creativity or flexibility.

### Database-Driven

- FYWD harnesses the power of mySQL database tables to create dynamic, database-driven websites that minimize repetitive work while maximizing efficiency and reliability.
